MEMORANDUM FOR: Chief, Exploratory Development Laboratory

SUBJECT : Use of EDL Space to Conduct a Human Factors  
Testing Program

1. In the data gathering phase of the current Human Factors Research program the Development Staff, TDS has need for an isolated work space where one or two PI test subjects can work in a quiet environment. This testing program will cover a time space of two or two and a half months beginning the middle of September and there is no such isolated work space in DS's fifth floor office space.

2. If the EDL can spare the use of Room 4N809 for a period of two or two and a half months, DS would like to use it for a testing work space. Needless to say, we would expect that throughout this period of time EDL people would, on occasion, have need to come into the room to obtain equipment stored on the shelves.
